

## **UKWA members get new Warehouse Auditor at reduced rate**

The new Warehouse Auditor, a continual improvement tool developed by Gideon Hillman Consulting and approved by UKWA, is available to members at a reduced rate.

Available for Android, iOS and Windows devices, the Warehouse Auditor is a new and unique combination of service and software designed for measuring and managing continual improvement. It uses photographic evidence-based auditing against a set of meaningful criteria.

The audit report includes an audit scoring system, recommendations and corrective actions to ensure continual improvement within warehouse and distribution centre operations, maintaining the effectiveness of logistics infrastructure, assets and processes.

The initial audit and set up cost of the Warehouse Auditor for UKWA members is discounted by £250 + vat, while the monthly licence is 30% off the standard rate of £100.

After the initial audit of your facility by one of our approved independent warehouse operations specialists - you have unlimited monthly usage of the tool for a single monthly cost. The initial Audit Assessment cost is subject to Warehouse size and type of operation.

### **The initial Audit and set up charge includes:**

- First audit by approved warehouse operations and systems specialist
- Detailed audit report with comments, observations and corrective actions
- 14 day free software trial (including user training)

### **Monthly software licence fee (initial 12 months minimum) includes:**

- Software installed on single device
- Set up and user training
- Technical support (including all software updates)
- Secure data hosting

If after the initial audit you decide to proceed with a software licence, then in addition to the standard Warehouse Auditor report you can also choose up to three additional reports from the list below (tailored to meet your specific requirements) at no extra charge.

- Health and Safety Checklist
- Site and Building Inspection
- HGV Walk-Around Checks

- Risk Assessment Inspection
- Forklift Truck and MHE maintenance
- Vehicle / defect audit
- Waste re-cycling inspection
- Food Safety Checklist Visit
